

Wednesday, March 22nd, at our I-695 TSMO project on the Baltimore Beltway a sudden and tragic traffic accident took the lives of five Concrete General employees.

Many associates in our industry worked with those that perished and may have known them in social settings, as well. We want to acknowledge the tragic loss to our Concrete General Family.

Each of these lives brought strength to the CGI family, knowledge of the tasks, and leadership in the industry. Their contributions to our team will be missed.

The Concrete General Family extends our deepest thoughts and condolences to the families and loved ones of those affected. We appreciate your thoughts for our employees and their families during this time of loss. We ask that all allow the families of those involved time to grieve.

Together, with our partners in State and Local agencies, we continue to work to make work-zones safer.
